

# Tips To Consider Before Buying A Heat Seal Press

from EzProducts International Inc.

**If you are going to barcode your customers' garments, your heat seal presses and permanent clothing labels are a mission-critical component.**

- 1 DO NOT buy the cheapest press.** Once you start labeling, the reliability and performance of your press is critical.
- 2 When considering your supplier, find out the level of their customer support.** Do you go to an automated system, or voice mail and hope for a return call? At EzProducts Intl Inc. the phone is always answered within three rings by a professional tech support individual.
- 3 Are there any tech support fees during or after the warranty expires?** We offer free tech support for the life of the presses and your calls are always free with our toll free number. Our presses can be upgraded, so present presses will not be obsolete.
- 4 What additional steps, if any, will your supplier offer in the beginning to help you through this stressful situation?** During the initial crunch, EzProducts Intl Inc. will rent you an additional press (buy one/rent one) to help you manage the transition. If you purchase the rental, all rental payments will be applied.
- 5 How much counter space will the press take and how much does the press weigh?** EzProducts Intl Inc. presses have a very small footprint and weigh only 15 pounds. Other manufacturers' heat seal presses are bulky, very heavy and take up a lot of space-they are outdated for today's dry cleaner locations.
- 6 How difficult is the press to repair?** EzProducts Intl Inc. presses can be repaired with common tools such as a screwdriver. Anything can be changed in ten minutes.
- 7 How quickly can you receive parts?** EzProducts Intl Inc. maintains an inventory of spare parts and will ship the same day. We will overnight a part to you, if needed in a warranty situation, at our cost
- 8 Are there interchangeable platens available for various fabrics and label sizes?** EzProducts Intl Inc. offers seven interchangeable platens that require no special tools. We offer truly inexpensive solutions for delicate expensive garments.
- 9 Does the press have any management tools?** EzProducts Intl Inc. records operator errors such as lifting the handle on the PopUpPress® instead of allowing the PopUp-Press to automatically lift, or trying to apply a label before the press is hot enough. This helps with operator training issues. Our presses with EzWizard™ software will detect if a garment is wet or very cold and automatically adds time to the cycle to insure the label will be applied properly. PopUpPress®, EzPress® and AirPress® from EzProducts Intl Inc. have all the features and more of a \$4500 press, but sell for less than \$1500.
- 10 What safety certifications does the press have?** All EzProducts Intl Inc. presses are TÜV SÜD, OSHA and CE certified. TÜV SÜD is the world's highest safety certification satisfying all 32 European Union countries, Australia, New Zealand and Canada requirements. In the United States, all equipment and materials used in the workplace must meet the Occupational Safety and Health Administration's (OSHA) standards for safety. These standards are found in the Federal Code of Regulations under Standards -29 CFR and are enforced through various programs.
