High Volume *digital PopUpPress*® & *digital EzPress*®

from EzProducts International Inc.

The **digital PopUp Press**® is **automatic**; the handle and hot platen automatically pop up when the application cycle is complete. The **digital EzPress**® is a **manual press**; a buzzer will sound when the application cycle is complete and the operator must promptly lift the handle to remove the hot platen from the garment.

NEW *EzWizard*™ **Software with Hot Platen Supercharger**™ Calibrated to display the temperature with 1º accuracy and will hold platen temperature to within 1% of your pre-set value.

PRESS FEATURES
- Use to apply all bar code, text labels, emblems and mending patches
- Automatically adds additional time if the garments are damp or cold
- **Operator error alert with supervisor auditing** - alerts when platen is too hot or cold or if handle is lifted before pre-set application time has lapsed.

(Hot Lower Platens are **NOT** QuickChange™ Interchangeable Lower Platens)

The **digital EzPress**® and **digital PopUp Press**® are simple and easy to operate.
- Time, temperature and pressure are automatically controlled.
- Heated platen is Teflon coated to prevent glue accumulation.
- Lower platen will automatically adjust to accommodate thick and thin garments without manual platen adjustments.
- Built from powder coated steel using reliable solid state components with no springs.
- Both designed for *high volume usage.*
- Both are easy to maintain, you can, *"repair any problem in 10 minutes."*

The **EzWizard™ Software** controls the time and temperature; and monitors the entire operation of the press.
- Alerts the operator of a pending problem; such as platen temperature too hot or too cold.
- Detects a 'Cool Cycle' which occurs when labeling damp or cold fabric and automatically adds a few seconds of application time to insure that every **label is always applied properly.**

The **EzWizard™** also monitors common operator errors and alerts the operator to prevent improperly applied labels. The **EzWizard™** counts and stores Application Cycles and all Operator Errors for **easy training and quality control.**

POSSIBLE ERRORS & ALERTS:
 Long Cycle: failure to lift the handle when the cycle was complete (EzPress®)
 Short Cycle: handle lifted before the application cycle was complete
 Cold Cycle: label applied before pre-set platen temperature
