Model-7D *digital PopUpPress*® & *digital Model-7D EzPress*®

from EzProducts International Inc.

The **Model-7D** *digital PopUp Press*® is **automatic**; the handle and hot platen automatically pop up when the application cycle is complete. The **Model-7D** *digital EzPress*® is a **manual press**; a buzzer will sound when the application cycle is complete and the operator must promptly lift the handle to remove the hot platen from the garment.

EzWizard™ **Software with Hot Platen Supercharger™** Calibrated to display the temperature with 1º accuracy and will hold platen temperature to within 1% of your pre-set value.

PRESS FEATURES
- HP7D Diamond Plated Upper Platen can apply our barcode labels at 350° and 5 seconds to fabric.
- The new Ventilated Lower Platen reduces application dwell time which saves both time and money.

WARRANTY
Two Year Factory Warranty on all parts and labor, 30-day Money Back Guarantee and Lifetime FREE Technical Support.

The Model-7D *digital EzPress*® and *digital PopUp Press*® are simple and easy to operate.
- Time, temperature and pressure are automatically controlled.
- Heated platen is Teflon coated to prevent glue accumulation.
- Lower platen will automatically adjust to accommodate thick and thin garments without manual platen adjustments.
- Built from powder coated steel using reliable solid state components with no springs.
- Both designed for *high volume usage.*
- Both are easy to maintain, you can, *"repair any problem in 10 minutes."*

The **EzWizard™ Software** controls the time and temperature; and monitors the entire operation of the press.
- Alerts the operator of a pending problem; such as platen temperature too hot or too cold.
- Detects a 'Cool Cycle' which occurs when labeling damp or cold fabric and automatically adds a few seconds of application time to insure that every **label is always applied properly.**

The **EzWizard™** also monitors common operator errors and alerts the operator to prevent improperly applied labels. The **EzWizard™** counts and stores Application Cycles and all Operator Errors for **easy training and quality control.**
